REVOLUTIONARY CRASH CARTS

Diverse range of cutting-edge products, each designed to meet specific needs.

The Poly Line stands out as a remarkable antimicrobial polymer, ensuring a 100% hygienic solution. For small spaces, the Ecoline 40by40 emerges as the ideal choice, combining practicality and efficiency with its narrow design.

Pegasus caters to varied preferences and applications through these innovative offerings.

POLY LINE
100% antimicrobial polymer

ECOLINE 40by40
Perfect for narrow spaces!

UNIFIED EMERGENCY SOLUTIONS

We cater to all emergency scenarios with our diverse range of specialized emergency carts, tailored to every situation and need

POLY PEDIATRIC

✓ MULTIPLE CARE & SECURE

Individual locks allow for simultaneous use in multiple emergencies and enable easy and fast restocking

PEDIATRIC

ADULT

POLY EMERGENCY

✓ QUICK OPENING

With one pull you can open all the drawers at once

✓ FAST & LIGHTWEIGHT

Lightweight and easy to maneuver, made from antimicrobial polymers

SCAN & AUDIT

ECOLINE 40by40

✓ ADAPTABLE TO LIMITED SPACES

Small footprint allows it to navigate tight spaces

NARROW SPACES

POLY CART

Innovating for the future in emergency care, our line now introduces a groundbreaking 100% antimicrobial solution — a revolution in all medical facilities

✓ **SECURE & LABELED**

The cart features two different types of locks — an external lock and a seal lock — with breakaway seals and a drawer labeling system, ensuring fast identification and usage of the cart's content

✓ **LIGHTWEIGHT & RESISTENCE**

Crafted from advanced polymer materials, this cart not only prioritizes durability and resistance but also ensures exceptional lightweight performance

✓ **VERRIDE LOCK**

Disable all locks in case of malfunction ensuring access to the cart

Poly Cart Blue version with Seal Lock

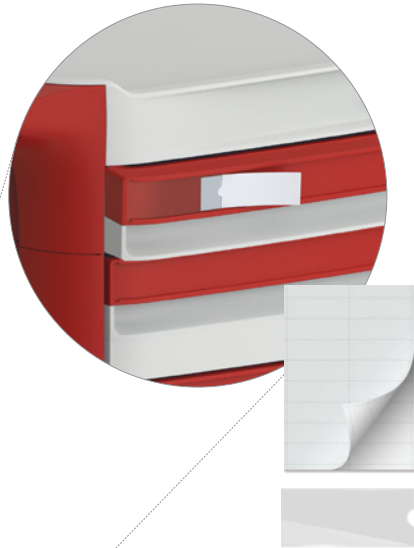

Poly Cart with Seal Lock

Poly Cart with External Lock

DRAWER LABELING SYSTEM

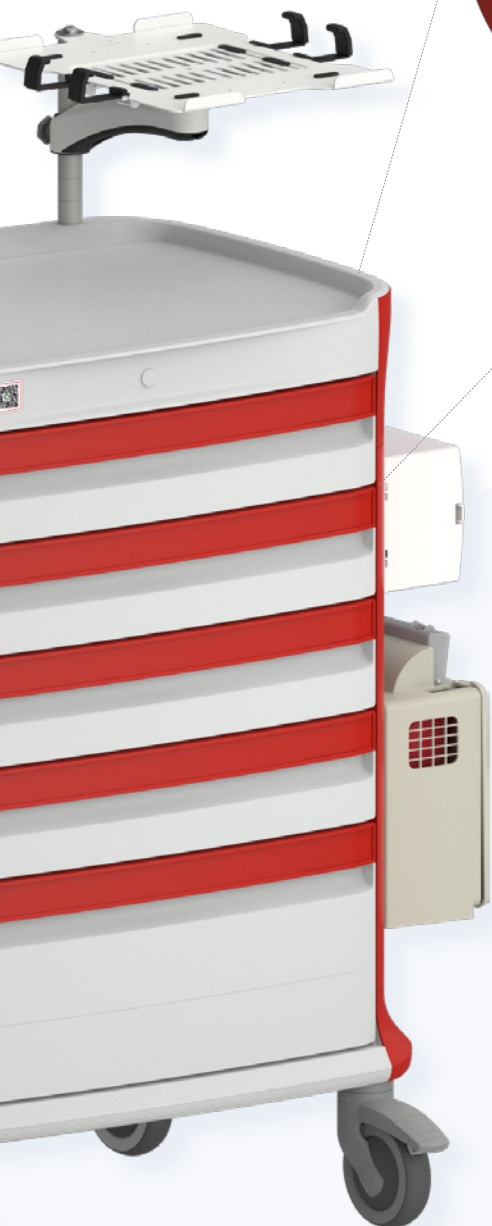

✓ QUICK SWITCH

The drawer labeling system is designed to allow for a quick switch of labels as needed

✓ RAPID IDENTIFICATION

The labeling system allows for quick and easy identification of the contents of each drawer

EXTERNAL LOCK

RECOMMENDED

✓ QUICK OPENING

With one pull you can open all the drawers at once

✓ RELIABLE

Being independent of an internal mechanical locking system guarantees lifetime access

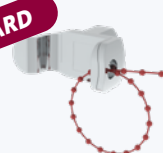

✓ CLEAR & SAFE

Easy to see when the cart's contents were utilized

PLY-EXLK

STANDARD

PLY-SLCK

SEAL LOCK

A sealed lock allows for a quick visual inspection to verify whether the cart has been accessed. This feature is especially valuable in fast-paced emergency situations where time is critical.

POLY CART

Enhanced organization, facilitates inventory management and reduces response time

✓ CLEAR & ORGANIZED

Equipped internally with baskets of various dimensions and multiple dividers, the cart incorporates an internal labeling system

✓ FAST & SECURE

The emergency hospital cart features four 5-inch swivel wheels for smooth rotation and quick movement, with two front wheels providing stability during stationary periods and critical procedures. Optionally, it can be equipped with a directional lock for fast, straight movement in long corridors

✓ TAILORED SOLUTION

Tailor our emergency cart to your exact specifications with customizable features including height, colors, locks, and a range of accessories. This ensures a uniquely crafted solution that meets the specific needs of your healthcare environment

PEDIATRIC POLY CART

Optimizing pediatric emergency response

✓ **MULTIPLE CARE**

Individual locks allow for simultaneous use in multiple emergencies and enable easy and fast restocking

✓ **QUICK & CLEAR**

Fast opening with one pull, and easy to see which drawers were utilized

✓ **RELIABLE**

Being independent of an internal mechanical locking system guarantees lifetime access

PLY-BRSLW-SET

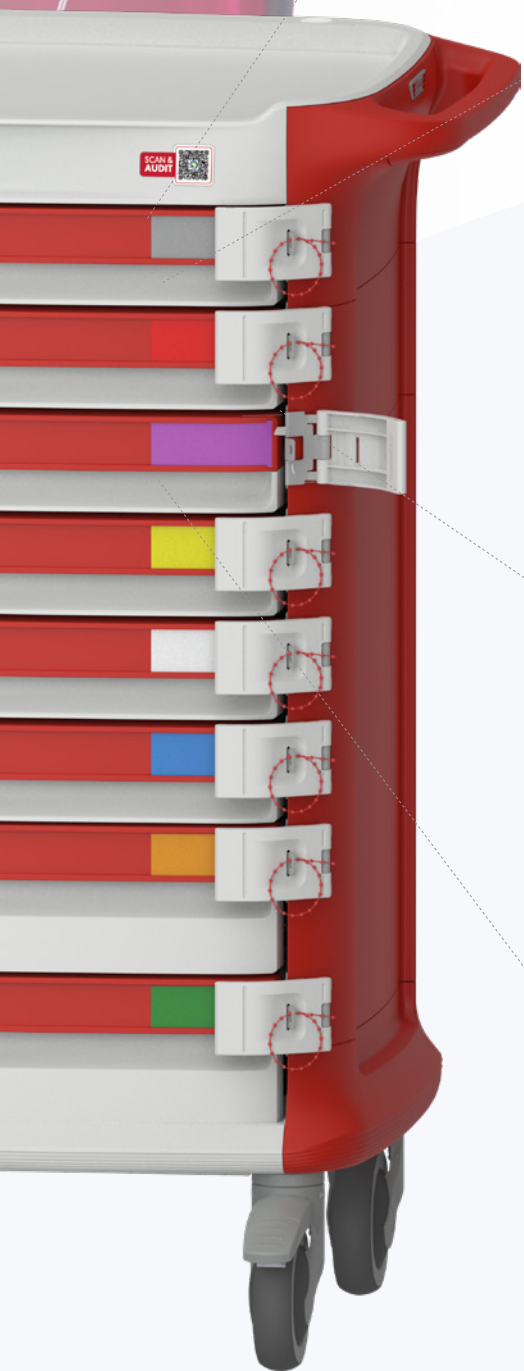

BROSELOW DRAWER LABELING SYSTEM

✓ EFFORTLESS LABEL ADAPTATION

The Broselow drawer labeling system facilitates quick label switches, ensuring adaptability to changing pediatric emergency needs

✓ RAPID IDENTIFICATION

The labeling system allows for quick and easy identification of the contents of each drawer

EXTERNAL SINGLE DRAWER LOCK

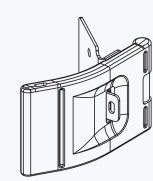

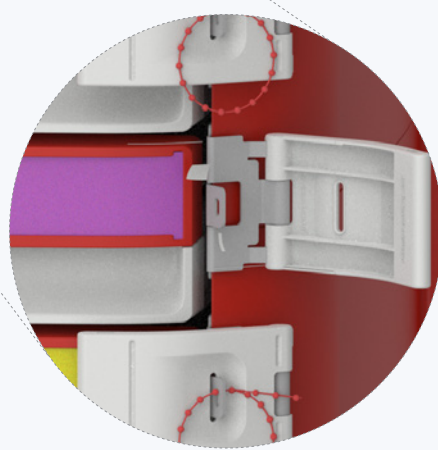

✓ ENSURE SAFETY

The Broselow Configuration, with its individual set of breakaway locks, enables quick and clear use for multiple care, promoting faster access and restocking. It equips medical staff with a swift and accurate response during critical pediatric emergencies

✓ PREVENT WASTE & SAVE TIME

By enabling the opening of only one drawer at a time, with all others securely locked, you avoid the need to discard everything in the cart after the emergency. Instead, you can restock only what was used while still being able to use the other drawers, preventing waste of material and time required to restock the entire cart
